### Hon. George Harre, Chief Justice GRAND COURT PRACTICE DIRECTION NO. 2/95 (GCR 0.1, r.12)

#### Attachment of Earnings Orders – Calculation of Post-Judgment Interest

#### (GCR 0.50A, r.7)

- 1. Wherever a judgment debt is ordered to be paid by instalments pursuant to an attachment of earnings order made under GCR Order 50A, rule 7, post-judgment interest will be calculated at the time of making the order.
- 2. The amount of interest will be calculated on the assumption that the instalments are paid on due date, using the following formula where D is the amount of the judgment debt (including principal and pre-judgment interest); N is the number of <u>monthly</u> instalments; R is the prescribed rate; I is the interest payable; and X is the amount of each instalment, i.e. the normal monthly deduction rate.

# $\Box \Box \underline{DxN} \Box \Box R = I$ $\Box 24 \ \Box$

Amount of each instalment will be

# $\Box \Box \underline{D} \Box \Box + \Box \Box \underline{I} \Box \Box = X$ $\Box N \Box \Box N \Box$

### Example:

Judgment debt CI\$12,500 which is to be payable by equal instalments over 36 months. The prescribed rate of post-judgment interest payable on CI dollar debts is currently 8% per annum. The monthly instalment is therefore CI\$388.89 calculated as follows:

Interest payable

### $\Box \Box \underline{12,500x36} \Box \Box 8\% = 1,500$ $\Box 24 \Box$

The amount of each instalment

## $\Box \Box \underline{12,500} \Box \Box + \Box \Box \underline{1,500} \Box \Box = 388.89/month$ $\Box 36 \Box \Box 36 \Box$

Each instalment therefore comprises principal of CI\$347.22 and interest of CI\$41.67.

DATED this 1<sup>st</sup> day of May, 1995.

Hon. George Harre, Chief Justice
